

Hello.

minicute®

The Most Comfortable Mouse

minicute | EZMOUSE⁵

A U.S. Department of Labor report says that RSI (Repetitive Strain Injury) of the part above the waist (e.g. wrist, elbow, shoulder) accounts for 2/3 of the occupational diseases having been reported, among which CTS (Carpal Tunnel Syndrome) is the most often. Therefore U.S. Department of Labor declares that CTS is the main occupational disease in 2000's, and it has made employees disable in a large scale.
Around 36% of the people suffering from CTS will take a surgery. And among them nearly 50% will relapse within 6 weeks to 6 months if they do the same work as before. Only 23.1296 of them will fully recover.

Symptoms of CTS

Stiff Elbow

Sore Neck

Painful Wrist

Pricking Shoulder

World first removable patented palm rest . Offer full support for you palm to avoid rub.

Work more precisely without the palm rest

When you work on a keyboard tray or a narrow desktop, you may remove the palm rest which occupies a larger space.

Install the palm rest to protect your palm

Work with the palm rest and your palm is protected. To get precision please move your elbow or wrist to work.

World first weight adjustable patented design.

Your health and surprise motivate us.
minicute®
We have been striving.
